

The Tongo Lizard

Powerful, Poisonous Predatory - this wild beast is currently stalking our school corridors, looking to catch vulnerable passersby. Although this Lizard may look cute, he can bite with force of a lion, leaving a mark on your hand in one strike. With claws as sharp as knives, this cold-blooded creature has spiky skin in shades of the darkest, midnight black and bright orange. His deadly spikes stop anyone from putting their paws on him. Piercing red bloodshot eyes, used for skillfully seeing in the dark, shoot invisible lasers into your soul, making you think twice about approaching. You may regret it if you do. With his incredible speed, the Tongo Lizard can scamper as fast as a cheetah hunting its prey. Beware of this lethal reptile, approaching him may be the last thing you ever do!
