

Dragons

Would you like to know more about dragons? Then let me tell you about the one I have seen. There is only one Purple Spiked Dragon left in the world and people are no longer able to find it.

Appearance

This scary purple dragon has a very scaly body with little ones covering his sides and large ones all along his belly. Bright yellow oval eyes sit in a narrow face that also has three short horns on its nose.

Habitat

In a dark scary forest is where the Purple Spiked Dragon lives. Surrounded by tall twisted trees is its dark rocky cave with pointy rocks on the ceiling, black boulders and jagged rocks.
