

On Monday 24th June 2024, year 2 went to call

of the Wild Zoo because we wanted to learn about animals and their habitats so we are better at science. When we were on the coach, we were very hot and sweaty because it was 24 degrees so it was boiling. Finally, we arrived at the Zoo's entrance. Firstly, we saw small, pretty birds which were gliding softly around us, everyone felt very excited. Before we saw that, the birds were flying beautifully. After that, one of the Zoo Keepers, Brit, told us about different habitats and she brought out some animals such as a brown, hard cockroach and a fluffy black and white skunk. Did you know that skunks don't smell? After our talk, we took a class photo in front of a chicken coop. A little while later, we slowly got through the goats which were trying to escape and eat our lunches. A few minutes later, we went to see the penguins and it smelt extremely bad. How disgusting! Soon after that, ZCH had lunch on the dusty, brown bench which was hot because of the sun. Meanwhile, ZSS played in the playground while ZCH finished eating. At 1 o'clock, we watched an exciting show about different birds including a barn owl which was doing lots of tricks such as swooping over our heads, it was faster than me! It was incredible. Finally we saw some beautiful, pink flamingos then we quickly went back to the coach and I sat at the top, right at the front. What a fantastic day we had!
